

Always walk around the car to check no children are around before moving it.

Restrict access to the driveway from the house and front yard by using fences and gates.

Remember...
Don't go if you don't know!
You can prevent driveway runovers.

IS YOUR DRIVEWAY KIDSAFE?

**SUPERVISE,
SEPARATE & SEE**

**DON'T GO IF YOU DON'T KNOW!

Driveway Safety Checklist

- ✓ Are you aware of your car's blind spot?
- ✓ Do you know where children are when you move the car?
- ✓ Do they have a safe place to wave bye-bye from?
- ✓ Are children safely holding hands with another adult?
- ✓ If you are the only adult at home, are children inside the car with you?
- ✓ Do you have a safe play area away from the driveway?
- ✓ Have you walked around your car and checked before getting in to move it?
- ✓ Do you always have children in mind when using your reversing mirrors, sensors or cameras?
- ✓ Have you put your hand-brake on before getting out of the car?

Always watch children when cars are coming in and out of the driveway. Hold their hand or hold them close to keep them safe.

If you are the only one at home, have children in the car with you when moving it.

A driveway is a small road. Don't let children play in the driveway.

All cars have a large blind spot, some up to 15m behind. Even cars with reversing sensors and cameras can be involved in driveway runovers.
